

Pure Substance Database

The Pure Substance Database contains originally authored Material Safety Data Sheets (MSDS's) and Summary Sheets for more than 20,000 pure chemical substances. It is up-to-date (updated quarterly), standardized and includes European Community (EC) risk and safety data.

Features

- Originally researched MSDS's for more than 20,000 pure substances
- MSDS's prepared and maintained quarterly by professional ChemADVISOR research analysts
- Analysis based on a library of 200 resources of chemical health and safety data
- 16 section format which conforms to:
 - ANSI Z400.1 (current standard)
 - UNECE Purple Book
 - EU Standard
- Quarterly updates delivered to customers
- Multiple languages:
 - Spanish, Canadian French, French, UK English, Italian, German and others

Benefits

- Compliant, reliable, cost effective MSDS's
- Access to up-to-date and accurate MSDS's
- Multiple languages for international operations
- International solution for standardized MSDS's
- Continuous support from qualified, professional EH&S experts
- Excellent reference document

Critical Issues Solved

- Provides reliable chemical data to populate enterprise-level health & safety systems
- Offers alternative source of MSDS databases complete with ongoing updating and review
- Completes missing MSDS data critical to daily operations

Solution Components

- Standard MSDS format for all data
- Summary Sheets, label information and other related regulatory data available
- Expanded chemical data:
 - regulatory information
 - transport designations
 - detailed toxicological data
 - extensive physical properties
