## Document Delivery System

---

*The Document Delivery System (DDS) is an automated (M)SDS management system. The DDS will interact directly with your sales system to determine the appropriate (M)SDSs to deliver, based on the material sold, the customer's location, and applicable regulations.*

### Features

- Delivers (M)SDS's and/or other documents as required
- Automatic interaction with customer's sales transaction system
- Tracks document distribution to customers
- Various detailed and summary activity reports
- Compatible with SAP and other ERP systems
- Documents are delivered to customers by mail, fax, or e-mail

### Benefits

- New customers receive the (M)SDSs appropriate to their order
- All customers receive updated (M)SDSs upon their next order
- Allows users to meet SARA 313 and Dangerous Preparation (M)SDS delivery requirements
- Allows users to track MSDS delivery by business unit, product, (M)SDS format and (M)SDS language

### Integration

- ChemADVISOR's DDS has a standard interface that uses the XML file format to receive information from a client's ERP system. We will work with the client to implement and customize the DDS as necessary.
